On The Cover: *the Vinyl Carriage* with *Designer Package*

The shed pictured on the cover is a 10x16 Carriage shed. It features our Designer Package and is shown with linen vinyl siding, clay trim, clay doors, and weatherwood shingles. To see more information on our Carriage shed see pages 8 and 9.

As you decide which shed style suits you best, keep in mind that each model is mostly defined by its roofline or roof shape. For example the workshop has a basic A-frame roof shape, the barn has a gambrel roof, and the carriage has a saltbox style with its offset roof.

The placement of the doors and windows can be changed to fit your needs. Even though some of the models are shown with doors and windows in different locations, the layout is up to you!

Table of Contents

Designer Package

Throughout this brochure, you will notice that we feature our Designer Package on select models. The Designer Package is simply an assortment of options that can be purchased as a package. The Designer Package can be added to select shed models, and it consists of the following options / upgrades:

- ❖ Larger windows (24x36)
- ❖ Z style shutters *
- ❖ 3 1/2" curved picture frames on windows
- ❖ 3 1/2" curved trim on the door
- ❖ Decorative hinges on doors
- ❖ 3 1/2" corner trim
- ❖ Painted rake and fascia trim
- ❖ Two 12x18 vents *
- ❖ Workshop models have a 7 pitch roof and 10" overhangs
- ❖ Carriage models have a 5.5 pitch roof, 16" overhang on front, and 10" overhang on the gables
- ❖ Barn models have a standard roof pitch and 6" overhangs

* This option may be omitted if there is not sufficient space on a particular area of the shed.

Construction

All of our sheds are built with high-quality materials and with structural longevity in mind. We start by using pressure treated 4x4 beams as a base. On top of these beams, we install 2x4 floor joists (16" on center) which are the foundation for your shed. On the garages, the

floor joists are 12" on center for additional strength. The walls are assembled using 2x4 studs (16" on center) and are sheathed with Duratemp exterior plywood. Vinyl sheds are sheathed with OSB then covered with vinyl siding. Next comes the 2x4 rafters (16" on center) which are covered with OSB and finished with self-sealing architectural shingles. Our careful construction results in a shed that will endure for many years to come.
